# Privacy & Cookies Policy

Camden Acquisition Hub Ltd · Company No. 15431935 · ICO Reg. ZC148168
349 Royal College St, London NW1 9QS
Last updated: 14 October 2026 — supersedes all previous versions, including the 18 September 2026 edition.

## 1. Introduction

This Privacy & Cookies Policy explains how Camden Acquisition Hub Ltd (“we”, “us”, “our”) collects, uses, stores, and protects personal data in connection with the services we provide through two service brands:

- Camden Acquisition Hub (camdenacquisitionhub.com) — a dental marketing agency serving independent dental practices in NW London (NW1, NW3, NW5, NW6): Google review automation, missed call recovery, reputation management, and hyper-local SEO.
- Try Review Bloom (tryreviewbloom.com) — a Google review automation and Google Business Profile (GBP) management service for independent health and wellness businesses in London.

Both brands operate under Camden Acquisition Hub Ltd, a company registered in England and Wales (Company No. 15431935), registered with the Information Commissioner's Office under registration number ZC148168. Try Review Bloom was previously operated under the company name Patient Acquisition Hub Ltd; this is the same legal entity, since renamed.

This policy is the single, current version for both brands and supersedes any other privacy policy page previously published on either website. Both websites link to this document.

## 2. Roles & Responsibilities (UK GDPR)

### Data Controller

Camden Acquisition Hub Ltd is the Data Controller for data collected directly through our websites, marketing activity, and platform accounts (business client sign-up, login, billing).

### Data Processor

Where we process data on behalf of a client — for example, processing a patient or customer's contact details to send review request SMS or email messages — we act as a Data Processor under instruction from that client. The client remains the Data Controller for their own customers' or patients' data and is responsible for having a lawful basis to share it with us.

## 3. What Data We Process

### 3.1 Review Automation Data (both brands)

To deliver automated review request campaigns, we process:

- Customer/patient first name and mobile number, provided by the client
- Job or appointment completion timestamps used to trigger the review request sequence
- Message delivery status (scheduled, sent, failed)
- Whether the customer has indicated they left a review, or opted out
- The client's own Google review link, used to direct customers to leave a review

We do not store clinical notes, treatment details, or diagnoses for dental practice clients.

### 3.2 Google Business Profile (GBP) Data

For clients using GBP management or connecting their Google Business Profile, we may process:

- GBP listing details (business name, address, hours, categories, photos)
- Review content and star ratings (publicly visible data from Google)
- GBP performance metrics (views, searches, call clicks, direction requests)

- Where a client connects their Google Business Profile account, an access token that allows us to read the profile data listed above, and where enabled, post replies to reviews on their behalf, for as long as the connection remains active
- Competitor GBP data used for comparative audits (publicly available data only)

A client may disconnect their Google Business Profile at any time from their dashboard, which immediately revokes our access and deletes the stored connection token.

### 3.3 Job Management Software Data

Where a client connects a supported job management platform (for example, ServiceM8), we process an access token that allows us to detect when a job is marked complete and to read the associated customer's name, phone number, and email, solely in order to trigger a review request. This connection can be disconnected by the client at any time from their dashboard, which revokes our access.

### 3.4 Social Media Data (Facebook & Instagram)

Where a client chooses to connect a Facebook Page or Instagram Business account, we process:

- An access token that allows us to publish content to that Page or Instagram account on the client's behalf, for as long as the connection remains active
- The content of the client's own Google reviews (reviewer's first name, star rating, and review text) used to generate a templated social media post

We do not access a client's private messages, personal Facebook profile, friends list, or any data beyond what is required to publish to the connected Page or Instagram account. A client may disconnect this at any time from their dashboard, which immediately revokes our access.

### 3.5 Client & Billing Data

- Business name, registered address, and company/VAT number where applicable
- Authorised contact name, email address, and phone number
- Billing information, processed via Stripe (we do not store card details)
- Login credentials (passwords stored as salted hashes, never in plain text)
- Service usage history and correspondence records

### 3.6 Website & Technical Data

- IP address (short-term, for security and abuse prevention)
- Browser type, device type, and referral source
- Pages visited and session duration (aggregated analytics)
- Booking data when a free strategy call is booked via our scheduling tool

### 3.7 Prospecting & Outreach Data

In the course of business development, we may hold business information about prospective clients, sourced from Companies House, Google Maps and Google Business Profiles, public directories, or the business's own website. This may include:

- Company name, company number, company type, status and registered office address (from Companies House)
- Trading name, business address, website, phone number, and Google star rating and review count (from Google and the business's website)
- A business email address that the business publishes for enquiries, and the name of a business contact where one is published

We send unsolicited marketing emails only to limited companies and limited liability partnerships, at business addresses they publish. We do not email sole traders or partnerships without their consent. Every outreach email identifies us, explains where we obtained the business's details, and includes a simple way to opt out. We process this data under legitimate interests for B2B outreach and delete it promptly on request.

## 4. Special Category Data

Our platform does not intentionally process clinical health records or special category data as defined under UK GDPR Article 9. Because dental practice clients use our systems in a healthcare-adjacent context, we apply enhanced security controls as a precaution, including encrypted connections, access controls, and defined data retention schedules.

## 5. Lawful Basis for Processing

| Processing Activity | Lawful Basis |
|---|---|
| Delivering contracted services to clients | Performance of a Contract (Art. 6(1)(b)) |
| Review automation and GBP management on behalf of clients | Performance of a Contract |
| Sending review requests to customers/patients | Legitimate Interests of the client (B2B); client's own consent mechanism (B2C) |
| Posting to a client's connected social media account | Performance of a Contract, at the client's direction |
| Website analytics | Legitimate Interests (aggregated, non-identifiable) |
| Billing & account management | Performance of a Contract; Legal Obligation |
| B2B prospecting outreach | Legitimate Interests (Art. 6(1)(f)) — proportionate B2B direct marketing under PECR, to limited companies and LLPs only |
| Audit logs & legal compliance | Legal Obligation (Art. 6(1)(c)) |

## 6. SMS & Email Review Requests

Our core service involves sending SMS and email messages to a client's customers requesting a Google review. The following safeguards apply:

- Every message includes an opt-out mechanism
- A cooldown period (configurable per client, minimum industry-standard practice) prevents the same customer from being messaged again too soon
- Customers who confirm they have already left a review are automatically suppressed from further messages
- Requests are sent gradually, never as a mass blast, to maintain authenticity

SMS messaging complies with the Privacy and Electronic Communications Regulations (PECR) and ICO guidance on direct marketing. We only operate within the United Kingdom at this time.

## 7. How We Use the Data

We use data strictly to:

- Deliver Google review automation, GBP management, missed call recovery, and reputation monitoring services
- Send post-appointment or post-job review request SMS and email sequences on behalf of clients
- Automatically reply to positive Google reviews and, where enabled, publish templated social media posts based on new positive reviews, on behalf of clients
- Generate campaign performance dashboards and reports for clients
- Process billing and manage client accounts
- Maintain platform security and prevent unauthorised access
- Conduct B2B outreach to prospective clients (business contact data only)

We do not:

- Sell personal data to any third party
- Share data with advertisers or data brokers
- Use data for automated profiling or AI-driven decisions that significantly affect individuals
- Process clinical notes, treatment records, or patient diagnoses

## 8. Technology We Use (Sub-Processors)

We use the following third-party providers to deliver our services. Each is subject to a Data Processing Agreement or equivalent contractual safeguard, and we use Standard Contractual Clauses (SCCs) approved under UK GDPR where data is processed outside the UK.

| Provider | Purpose | Location |
|---|---|---|
| Supabase | Database, authentication, scheduling and message dispatch, and secure storage of client and customer data | EU (Ireland) |
| ServiceM8 | Where a client connects their account, detecting job completion and reading customer contact details on their behalf | Australia (SCCs in place) |
| Twilio | SMS message delivery and phone number provisioning | USA (SCCs in place) |
| Vercel | Hosting for the client dashboard and login portal | USA/Global (SCCs in place) |
| Stripe | Payment processing (we do not store card details) | USA/EU (SCCs in place) |
| Cal.com | Booking data for free strategy calls | EU/USA (SCCs in place) |
| Google Business Profile API | Where a client connects their profile, reading listing/review data and, where enabled, posting review replies on their behalf | USA (Google's standard safeguards apply) |
| Google Maps Platform (Places API) | Reading publicly available business listing data (name, address, rating, review count) for audits, review widgets and B2B prospecting | USA (Google's standard safeguards apply) |
| Meta Platforms, Inc. (Facebook/Instagram) | Where a client connects a Facebook Page or Instagram Business account, publishing templated review-based posts on their behalf | USA (SCCs in place) |

We do not use GoHighLevel, Mailgun, Zapier, or Make.com as part of our own service delivery. A client's own third-party integrations they choose to connect to their job-management software are outside the scope of this policy and are governed by that provider's own terms.

## 9. Data Retention

| Data Type | Retention Period |
|---|---|
| Review request delivery data | Duration of client contract + 30 days |
| GBP audit, performance, and connection data | Duration of client contract + 6 months, or until disconnected |
| Job management software connection data | Duration of client contract, or until disconnected |
| Social media connection and posting data | Duration of client contract, or until disconnected |
| Client account & billing data | Duration of contract + 7 years (legal requirement) |
| Website analytics (aggregated) | Rolling 26-month window, anonymised |

| Data Type | Retention Period |
|---|---|
| B2B prospecting contact data | Until opt-out request, or 12 months from last contact |
| Marketing suppression list (businesses that have opted out) | For as long as we carry out outreach, holding only the minimum needed to make sure we do not contact them again |
| Aggregated performance metrics | Indefinite — cannot be traced to individuals |

## 10. Data Sharing

We do not share personal data with third parties except the sub-processors listed in Section 8, necessary to operate our services. We will disclose data to law enforcement or regulators only where required by applicable law, and will inform affected clients of any legally permissible compelled disclosure.

## 11. Security Measures

- Encrypted connections (HTTPS/TLS) across all web properties and APIs
- Role-based access control — client data is scoped and isolated per account
- Multi-tenant architecture with no cross-client data access
- Stripe tokenisation — no raw payment card data stored by us
- Audit logging of sensitive data access events
- Defined deletion schedules for data no longer required

In the event of a personal data breach that poses a risk to individuals' rights, we will notify the ICO within 72 hours and affected clients as soon as reasonably practicable.

## 12. Your Rights Under UK GDPR

| Right | Description |
|---|---|
| Right to be Informed | To know how your data is collected and used — this policy fulfils that obligation |
| Right of Access | To request a copy of the personal data we hold about you |
| Right to Rectification | To request correction of inaccurate or incomplete data |
| Right to Erasure | To request deletion of your data, subject to legal retention obligations |
| Right to Restrict Processing | To ask us to limit how we use your data in certain circumstances |
| Right to Object | To object to processing based on legitimate interests, including direct marketing |
| Right to Data Portability | To receive your data in a structured, machine-readable format |
| Rights re. Automated Decisions | We do not make solely automated decisions that significantly affect you |

To exercise any of these rights, contact us using the details in Section 16. To stop receiving marketing emails from us, use the unsubscribe link in any email or reply asking us to stop. Where we process data as a Data Processor on behalf of a dental or business client, we will redirect your request to the relevant Data Controller (the client).

## 13. Cookies Policy

| Category | Purpose | Can Be Disabled? |
|---|---|---|
| Essential | Authentication, session management, security — required for the platform to function | No |
| Analytics | Aggregated, anonymised usage data (page views, session duration, traffic source) | Yes |
| Third-Party | Our scheduling tool (booking) and analytics providers operating under GDPR-compliant agreements | Yes |

You can control and delete cookies through your browser settings. Disabling essential cookies may affect the functionality of our dashboards and portals.

## 14. International Data Transfers

Our primary database is hosted in the EU (Ireland). Where personal data is processed outside the UK or EEA — for example, via Twilio, Vercel, Stripe, ServiceM8, Google, or Meta — we ensure appropriate safeguards are in place, including UK-approved Standard Contractual Clauses (SCCs) or adequacy decisions.

## 15. Children's Data

Our services are directed at businesses and their adult customers. We do not knowingly collect personal data from individuals under the age of 18 through our websites or marketing activities. If a client's customer base includes under-18s, it is that client's responsibility, as Data Controller, to ensure appropriate consents are in place before sharing any such data with us.

## 16. Contact & Complaints

| Company | Camden Acquisition Hub Ltd |
|---|---|
| Company No. | 15431935 |
| ICO Registration | ZC148168 |
| Registered Address | 349 Royal College St, London NW1 9QS |
| Email | julien@camdenacquisitionhub.com |
| Website (Camden Acquisition Hub) | camdenacquisitionhub.com |
| Website (Try Review Bloom) | tryreviewbloom.com |

You also have the right to lodge a complaint directly with the Information Commissioner's Office (ICO): ico.org.uk, helpline 0303 123 1113. We would always prefer the opportunity to address your concern directly before you contact the ICO.

## 17. Changes to This Policy

We review and update this policy periodically to reflect changes in our services, applicable law, or regulatory guidance. Material changes will be communicated to active clients by email with at least 14 days' notice before taking effect. The current version of this policy is always available at camdenacquisitionhub.com and tryreviewbloom.com, and both websites link to this single document.

This policy supersedes all previous versions, including the version dated 18 September 2026. This version adds Companies House as a source of prospecting data and sets out the safeguards for B2B outreach emails, adds Google Maps Platform (Places API) as a sub-processor, removes Make.com (no longer used), adds a retention period for the marketing suppression list, and updates the description of Try Review Bloom to independent health and wellness businesses in London.
